Performance just got a little bit easier. Optimizing images by hand is time consuming and painful. Smush it does it for you.

Refresh is a community of designers and developers working to refresh the creative, technical and professional aspects of new media endeavors. [Find out more at refreshingcities.org](#) »

## FLICKR

[All photos tagged "refreshjacksonville" »](#)

The page at <http://refreshjacksonville.org> says:  
hi

OK

format and reduce fluff or filler. Finally, putting together a few slides and bringing them to the meeting encourages talking about what you're working on in the moment, the project, task, or hobby that's consuming your free cycles.

We have a few folks signed up. The tentative list of speakers can be found here:  
<http://bigtiger.github.com/2009/01/12/techa-kucha.html>

If you're interested in participating please get in touch with or simply get prepared and bring your slides. We'll accommodate everyone we can.

P.S. Remember refresh is always BYOB.

### THE DEETS:

January 29th, 7:00 pm - 9:00 pm

## Gist for Greasemonkey

 [pjhyett](#) Jan 19

We're now appending the gist name at the end of its raw url. That means it's dead-simple to serve [greasemonkey](#) (or [greasekit](#)) scripts directly from [gist.github.com](#). I was able to write my first script and install it in less than five minutes:

```
// ==UserScript==  
// @name           Kottke Blue Border Remover  
// @namespace      http://gist.github.com/49129  
// @description    Gets rid of that annoying blue border wrapping ko  
// @include        http://*.kottke.org  
// @include        http://*.kottke.org/*  
// ==/UserScript==  
  
var els = ['t', 'b', 'l', 'r', 'tl', 'tr', 'bl', 'br']  
for(var i in els) {  
  document.getElementById(els[i]).style.display = 'none'  
}
```

This Gist brought to you by GitHub.
